Abdus Shohid Shakil

Software Developer | Software Quality Assurance

Sylhet, Bangladesh shakil102043@gmail.com 0170 337 41 62 Portfolio LinkedIn GitHub

Professional Summary

Software Developer and Software Quality Assurance professional with experience in web and desktop application development and SaaS testing. Built APIBolt and its theme marketplace; experienced in functional, regression, exploratory, and API testing.

Professional Experience

SQA Engineer Intern *Aug 2026 – Present*

AppifyLab – ezyCourse

- Test a multi-role SaaS learning platform across Admin, Teacher, Seller, and Student experiences, covering functional, regression, smoke, and exploratory scenarios.
- Investigate end-to-end workflows including course access, memberships, checkout, payments, enrollment, events, notifications, and user permissions.
- Validate API behavior using Postman and browser developer tools, inspecting requests, responses, and application behavior to isolate issues.
- Create and execute test scenarios, document reproducible bugs with steps and evidence, and verify fixes across staging and live environments.

Projects Experience

APIBolt (v2.1.1) 2025 – Present

- Developed a desktop REST API client for project-based API workflow management.
- Implemented multi-method authentication (API Key, Bearer Token, Basic Auth) with inheritance support.
- Developed **ABTestEngine** for automated API response testing with structured scripting utilities.
- Designed environment variables system, request history tracking, cookie management, and customizable workspace layouts.
- Implemented automatic code generation in multiple programming languages and local password-based security.
- Managed **30+ database tables** with complex Redux state management and Electron main process architecture.

Tech Stack: TypeScript, Electron.js, React.js, TailwindCSS, ShadCN, Redux Toolkit, SQLite, DrizzleORM, Motion

GitHub Video Demo ERD

APIBolt Market – Theme Marketplace 2025 – Present

- Built the official theme marketplace for APIBolt where developers can create, publish, and share themes with the community.
- Implemented authentication using GitHub OAuth and theme publishing system for developers.
- Developed seamless integration with the desktop app for browsing and one-click theme installation.
- Enabled a growing ecosystem with **130+** community-created themes.
- Created **developer documentation** for API testing (**ABTestEngine**) and platform usage.
- Optimized frontend performance, achieving **100 Performance and 100 SEO scores in Google Lighthouse audits**.

Tech Stack: TypeScript, TailwindCSS, ShadCN, React.js, Next.js, Zustand, Supabase, Prisma, Hono, Motion.
